

## Your Leader In The Field

*Since J&M introduced their first gravity wagon in 1960, they have developed many patented designs and features that have provided farmers with better solutions transporting seed from storage, to the field and back again, saving both time and money.*

*Our durable wagons feature a heavy gauge steel tank with steep slopes and graphite coated interior for complete cleanout, even in higher moisture grains. Our heavy duty sleeved spindles and short turning radius design ensures maximum performance, even in the most demanding conditions.*

- 250 to 760 Bushel Capacity with Optional Dual Compartments
- 8 to 24 Ton Running Gear with Optional Hydraulic Drum Brakes
- Heavy Duty Sleeved Spindles
- Short Turning Radius
