

Side-Shooter

Upper Auger Spout Design

FOR MAXIMUM EFFECTIVE SIDE REACH

Single Front-Folding Auger Design

The unloading auger is turned to throw grain perpendicular to the semi-trailer, maximizing auger side reach and throw for a complete fill every time.

The Side-Shooter Spout throws the grain directly towards the semi-trailer, not at an angle, maximizing side reach.

Dimension A Actual Side Reach	
1326-22	7'-4"
1151-22	8'-0"
1000-20	8'-0"
875-18	8'-7"
750-18	8'-7"
Dimension B Effective Side Reach (Throw)	
1326-22	9'-9"
1151-22	10'-5"
1000-20	10'-5"
875-18	11'-0"
750-18	11'-0"

Patented Hydraulic Flow Control Spout easily corrects auger position on too close or too far away approaches.
